Animation: Moving Eyes Fox

Nothing can escape the eyes of the clever and vigilant Mr. Fox. Follow the instructions given below to create your very own moving eyes fox toy.

1. Colour the fox template given below. With the help of an adult, cut out the shapes (eye strip, fox face and two thin strips for the loops). Cut off the eye area from the face.

2. Apply little glue on the edges of the thin strips and stick one strip behind each eye, creating two loops. Carefully insert the eye strip in the loops. Pull the strip left, right, up or down and enjoy the changing expressions of Mr. Fox.
