Nature : Parts Of A Tree

Different statements related to parts of a tree are given below. Identify if they are true or false and mark them accordingly. The first one has already been done for you.

1.A tree's leaves collect energy from the sun and prepare food for the plant by following a process called Photosynthesis.

2.Trees reproduce by releasing seeds into the environment which require sunlight to grow and thrive.

3.A tree's root system pulls nutrients and water from the soil and carries it to the trunk for distribution through the tree.

4.The trunk transports sunlight throughout the plant and provides energy to the entire tree.

5.Branches serve as pipes for water and nutrients and as storage for extra sugar.

6.The roots are the part of a tree that grow above the soil and they help in the absorption of sunlight.
