Geography of USA

USA includes a handful of states; the state of Alaska, the Hawaii Island, the Virgin Islands, U.S., insular territories and many more. This country is under the North America and it is considered as the third largest country by area in the whole world. generally it is divided into seven geographical regions along with fifty states. The names of the seven different regions are given at the bottom. Consult a map or get help from your parents to mark them perfectly on the map below.
