3D Collage: Hot Air Balloon

Let's make a hot air balloon. Apart from this sheet, you would need thread and a glue stick. Colour the templates given below in different bright colours. Cut them out with the help of an adult. Put two pieces of thread between the square pieces and stick them together as shown in the picture. Fold the balloon templates in the center and stick them together with glue, as shown in the image below. Don't forget to add your square piece before you stick all the pieces.
