## Activity Game - Magnet Grid

Have fun playing Magnet Grid while discussing the concept of opposite poles attracting and like poles repelling. Print the page and cut along the dark dotted line. Then, cut the playing pieces apart along the lighter dotted lines. The full page of the playing pieces is in the reference sheet.

Player 1 keeps a piece on the desired block in the grid in the direction of his choice.

Player 2 will have to place his/her choice keeping in mind

that touching sides do not repel. Fill the grid accordingly, so no adjacent sides repel. If you're in a fix and have no place to move forward, place N to neutralize the effect for that block and restart from the next block.
