## STRING CRAFT : BASIC TECHNIQUES

Let us create a string art on paper. Take a print out of the design and make holes in the given points. Tools required for this activity are a needle, different colour strings and pair of scissors.

- 1 Take thread / string of your choice and start from the bottom side of the paper. Ensure that you secure the string with a knot.
- 2 Create your own design by running the coloured string through the holes. At the last hole secure the thread once again by tying a knot below the paper.
- 3 One finished pattern is shown for your reference.
